OUR SPIN FARMING PROJECT

- 'SPIN' stands for 'Small Plot Intensive' Farming.
- Pedal to Petal employs a bicycle-only powered style of SPIN farming, which virtually eliminates the use of fossil fuels in the food production process. We are a model of a truly greener future.

We are not just 'Carbon-Neutral'
We actually
Sequester Carbon!

It's true! We actually have a **negative carbon footprint** due to our human/bicycle-powered model.
